ISO50001

Aviva Stadium, 24th April 2013 IRELAND

SUPPORTED BY

www.iso50001ireland.ie

ISO 50001: is the International Standard for Energy Management, which was released in June 2011 and replaces the British and European Standard BS EN 16001:2009.

This new Standard provides the most robust framework for optimising energy efficiency in public and private sector organisations.

Certification to this standard defines an organisations commitment to continual improvement in energy management. Implementation will enable an organisation to lead by example within their respective industries and ensure related legislative and regulatory requirements are met.

SETTING WORLD CLASS STANDARDS IN ENERGY MANAGEMENT

EMPI is a professional body; it aims to foster world-class energy management services in the interests of customers, EMPI members, the environment, and protect the independence and integrity of the profession.

BREAKOUT SESSIONS: CERTIFICATION EUROPE

Apply now for your chance to speak to an energy systems expert at the ISO 50001 Ireland event.

We are delighted to announce that we have confirmed two ISO 50001 experts, who will be available for FREE one-to-one discussions and energy management guidance, at our inaugural event held at the Aviva stadium on the 24th of April. John Ryan and Dermot Gibbons, both from Certification Europe, are renowned international energy management experts. Certifying organisations to ISO 50001 globally, providing specialist training around the standard, and guest lecturing across the world. Both boast unique insights into energy management and ISO 50001.

John Ryan, a founding member of Certification Europe, and he was the first accredited ISO 50001 auditor in the UK and Ireland. John has written and authored numerous papers and publications in the energy management field including “EN 16001 Implementation and Internal Audit Guides”, as published by the SEAI. John was also the author of the British Gas sponsored book “Energy Management, Practise and Principles, MEUC, 2012”.

In total John boasts over 15 years’ experience in the field of ISO certification. In addition to his work within the energy management arena John is also the Director of the Independent Small to Medium Enterprise Association (ISME) so he understands a business’s needs to manager their costs.

John will be joined by his college Dermot Gibbons. Dermot is a lead ISO 50001 certification auditor with Certification Europe. He holds over ten years’ experience on large businesses projects. Dermot holds a BSc in Quality management and an MSc in renewable energy management systems technology. He has overseen large energy management projects that have delivered a 50% energy reduction to its clients. As an external assessor Dermot has certified numerous businesses and organisations to ISO 50001 throughout the UK, Ireland and the Middle East.

They will be available on a strictly limited basis of eight one-on-one sessions to go through your energy management system architecture. Discuss the areas which may cause trouble during an audit which may prevent you achieving ISO 50001 Certification. These sessions are provided to delegates for free but you will need to book to avoid disappointment.

To reserve your breakout session just email ronan@iso50001ireland.ie
